Assignment 1

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

Due on 2019-02-13, 23:59 IST.

1) *1 point*

Internet of Things (IoT) can be integrated with which of these separate domains

a. Cloud-based storage and computing.
b. Cyber Physical Systems.
c. Big-data networks.
d. All of these.

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
d

2) Which of the following is true? *1 point*

a. IoT is a subset of M2M
b. M2M is a subset of IoT
c. IoT is a subset of CPS
d. CPS is a subset of Web of Things (WoT)

- a
- b
- c

3) M2M is a term introduced by *1 point*

a. IoT service provides
b. Fog computing service providers
c. Telecommunication service providers
d. None of these

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

4) *1 point*

The number of possible addresses ca be achieve with IPv6 addressing

a. 2^6
b. 2^26
c. 2^32
d. 2^128

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
d

5) Which of the following is a major concern in IPv4 addressing? *1 point*

a. Reliable data transmission
b. Only addressing
c. Provide multicast addressing
d. All of these

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
a

6) Which of these statements regarding sensors is TRUE? *1 point*

a. Sensors are input devices.
b. Sensors can be analog as well as digital
c. Sensors respond to some external stimuli.
d. All of these.

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
d

7) A Transducers *1 point*

a. reduce the flow of current in a circuit
b. convert energy of one kind into another
c. increase the speed of a motor
d. convert a sensor to actuator

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

8) Potentiometer is which of the following types of sensor? *1 point*

a. Speed sensor
b. Light sensor
c. Position sensor
d. Force Sensor

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

9) *1 point*

Based on the data type, sensor can be classified in which of the two categories?

a. Analog and Digital
b. Isomorphic and Homomorphic
c. Scaler and Vector
d. Solid and Liquide

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

10 An actuator is a component of a machine or system, which *1 point*

a. senses and transmits the data
b. moves or controls the mechanism or the system.
c. only receives the data from other system
d. None of these

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

11 A pneumatic actuator converts *1 point*

a. Force in to pressure
b. Pressure in to acceleration
c. Pressure in to force
d. Force in to acceleration

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

12) *1 point*

A mechanical actuator converts

a. rotary motion in to electrical power
b. electrical power in to rotary motion
c. rotary motion in to linear motion
d. Linear motion in to rotary motion

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

13 Shape memory polymer (SMP) actuators function similar to ***1 point***

a. human bone
b. human muscles
c. human blood
d. None of these

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

14 Rack and pinion is an example of ***1 point***

a. Electrical actuator
b. Hydraulic actuator
c. Mechanical actuator
d. None of these

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

15 Which of the following actuator is used to handle fragile object? *1 point*

a. Tiny actuator
b. Light actuator
c. Soft actuator
d. Hydraulic actuator

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

As per our records you have not submitted this assignment.

Due on 2019-02-20, 23:59 IST.

1) In Near Field Communication (NFC), the active devices are able to *1 point*

a. only collect information
b. only transmit information
c. collect and transmit information
d. only receive information

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

2) The Physical layer of HART protocol is derived from *1 point*

a. IEEE 802.15.2
b. IEEE 802.15.4
c. IEEE 802.15.6
d. IEEE 802.16

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

3) Near Field Communication (NFC) is based on the principle of *1 point*

a. Reflection

- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
c

4) Inquiry run by one Bluetooth device to *1 point*

a. Form a connection with another device
b. discover other devices near it
c. participate in the network
d. isolate from the network

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

5) *1 point*

The sniff mode in Bluetooth is used to

a. Actively transmitting or receiving data
b. Sleep and only listens for transmissions at a set interval
c. Switch in power-saving mode where a device sleeps for a defined period and then returns back to active mode
d. Deactivate the slave

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

6) *1 point*

Which of the following layers provides connection-oriented and connectionless data services t upper layer protocols in blue tooth?

a. L2CAP
b. Baseband
c. Physical radio
d. Application

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
a

7) *1 point*

Which of the following modulations is utilized by Zwave?

a. Amplitude Phase Shift Keying (APSK)
b. Quadrature Phase Shift Keying (QPSK)
c. Frequency Shift Keying (FSK)
d. Gaussian Frequency Shift Keying (GFSK)

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
d

8) The PHY and MAC layers in ISA 100.11A are based upon; ***1 point***

a. IEEE 802.11a
b. IEEE 802.15.4
c. IEEE 802.15.6
d. IEEE 802.11g

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

9) Event aware topology management in WSNs include: ***1 point***

a. Timely detection of an event of interest
b. Monitoring the event
c. Adapting with the changes of event state
d. All of these

- a
- b
- c
- d

No, the answer is incorrect.
Score: 0

Accepted Answers:
d

10) WBAN stands for: ***1 point***

a. Wireless Buffer Area Networks
b. Wireless Body Area Networks
c. Wired Body Area Networks
d. Wired Buffer Area Networks

- a
- b

c

d

No, the answer is incorrect.
Score: 0

Accepted Answers:
b

11) *1 point*

In a wireless sensor network, a node which are unable to perform an operation, because of power failure and environmental effects is known as

a. normal node
b. selfish node
c. failed node
d. badly failed node

a

b

c

d

No, the answer is incorrect.
Score: 0

Accepted Answers:

Assignment 10

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

Due on 2019-04-10, 23:59 IST.

1) Smart Agriculture incorporates: *1 point*

- a. Alert generation in case of above-threshold pollutants in the air.
- b. Scheduling harvesting and arranging proper transfer of harvests to warehouses or markets.
- c. Both the above
- d. None of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
b. Scheduling harvesting and arranging proper transfer of harvests to warehouses or markets.

2) Heterogeneity for IoT in smart cities stands for: *1 point*

- a. Integration of varying hardware platforms and specifications.
- b. Integration of different radio specifications.
- c. Integration of various software platforms.
- d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

3) Which company first coined fog computing? *1 point*

- a. IBM
- b. HP
- c. Dell

sharing of media, control and access and can share network media resources?

- a. UPnP
- b. DLNA
- c. LAN
- d. WiFi

No, the answer is incorrect.
Score: 0

Accepted Answers:
b. DLNA

5) The need for smart cities arose due to: ***1 point***

- a. Rapidly growing urban population
- b. Fast depleting natural resources
- c. Changes in environment and climate
- d. All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of the above

6) The following goals are currently associated with smart vehicles: ***1 point***

- a. Assistance to drivers during bad weather or low-visibility.
- b. Detection of bad driving patterns or driving under the influence of substances.
- c. Auto alert generation during crashes.
- d. All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of the above

7) Which of the following is a social and legal challenge of IoT in smart cities? ***1 point***

- a. Services based on user provided information may be subject to local or international laws.
- b. Individual and informed consent required for using humans as data sources.
- c. Both a and b
- d. None of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
c. Both a and b

8) In multi-sensor data fusion, which is true: ***1 point***

- a. Combines information from multiple sensor sources.
- b. Enhances the ability of decision making systems to include a multitude of variables prior to arriving at a decision.
- c. Inferences drawn from multiple sensor type data is qualitatively superior to single sensor type data.
- d. All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of the above

9) Amount of energy harvested depends upon: ***1 point***

- a. Sensitivity of the harvesting circuit
- b. Distance between the device and source
- c. Environment
- d. All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of the above

10) X-10 protocol is characterized by: ***1 point***

- a. Low-speed and low data rate.
- b. Low speed and high data rate
- c. High speed and low data rate
- d. High speed and high data rate

No, the answer is incorrect.
Score: 0

Accepted Answers:
a. Low-speed and low data rate.

11) UPnP stands for: ***1 point***

- a. United Protocol and Plugs
- b. Universal Protocol and Plugs
- c. Universal Plug and Play
- d. United Plug and Play

No, the answer is incorrect.
Score: 0

Accepted Answers:
c. Universal Plug and Play

12) Konnex (KNX) is: ***1 point***

- a. an open standard for home and building networks.
- b. Smart parking system
- c. Smart energy system
- d. None of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
a. an open standard for home and building networks.

13) HAN architectures: ***1 point***

- a. Uses XML for description and web-services for control.
- b. Follows a Service oriented Architecture (SOA).

c. Not tied to any software, language or architecture.

d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

14) Which of these can be considered as the skeleton for smart cities? ***1 point***

a. Buildings

b. Transportation

c. Banks

d. Sensors

No, the answer is incorrect.
Score: 0

Accepted Answers:
a. Buildings

15) DSRC in the context of smart vehicles stands for: ***1 point***

a. Detailed Short Rate Communication

b. Dedicated Short Range Communication

c. Data Short Range Communication

d. Data Spedy Robust Communication

No, the answer is incorrect.
Score: 0

Accepted Answers:
b. Dedicated Short Range Communication

Week 1 Assignment 1

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

Due on 2019-08-14, 23:59 IST.

1) The main function of an IoT Gateway can be summarized as: *1 point*

a. Forwarding packets between LAN and WAN on the IP layer.
b. Performing application layer functions between IoT nodes and other entities.
c. Enabling local, short-range communication between IoT devices.
d. All of these

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
a.

2) Which of the following is true? *1 point*

a. IoT is a subset of M2M
b. M2M is a subset of IoT
c. IoT is a subset of CPS
d. CPS is a subset of Web of Things (WoT)

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
b.

3) M2M is a term introduced by *1 point*

a. IoT service provides
b. Fog computing service providers
c. Telecommunication service providers
d. None of these

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
c.

4) The number of possible addresses can be achieved with IPv6 addressing *1 point*

a. 2^6
b. 2^26
c. 2^32
d. 2^128

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
d.

5) Which of these is NOT a part of the Service Layer of the IoT Service Oriented Architecture? *1 point*

a. Service integration
b. Service repository
c. Business logic
d. Data sensing and actuation protocols.

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
d.

6) Which of these statements regarding sensors is TRUE? *1 point*

a. Sensors are input devices.
b. Sensors can be analog as well as digital
c. Sensors respond to some external stimuli.
d. All of these.

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
d.

7) Which of these is NOT related to IoT scalability? *1 point*

a. Flexibility within Internet.
b. Large scale deployment.
c. Real-time connectivity of billions of devices.
d. Range of each sensor node.

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
d.

8) Which statement is NOT TRUE: *1 point*

a. IoT WAN connects various network segments.
b. IoT WAN is geographically wide.
c. IoT WAN is organizationally wide.
d. None of these.

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
d.

9) Based on the data type, sensor can be classified in which of the two categories? *1 point*

a. Analog and Digital
b. Isomorphic and Homomorphic
c. Scalar and Vector
d. Solid and Liquid

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
c.

10) Temperature, Speed, Pressure, Displacement, and Strain are *1 point*

a. Analog quantity
b. Digital quantity
c. Sometime analog, sometime digital
d. None of these

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
a.

11) Which of these is NOT a feature of Shape Memory Alloys (SMA)? *1 point*

a. Low density
b. Low strain recovery
c. Biocompatibility
d. Biodegradability

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
b.

12) A mechanical actuator converts *1 point*

a. rotary motion in to electrical power
b. electrical power in to rotary motion
c. rotary motion in to linear motion
d. Linear motion in to rotary motion

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
c.

13) The approximation of the measured property sensed by a digital sensor induces: *1 point*

a. Quantization error
b. Hysteresis error
c. Aliasing error
d. All of these

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
a.

14) Rack and pinion are an example of *1 point*

a. Electrical actuator
b. Hydraulic actuator
c. Mechanical actuator
d. None of these

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
c.

15) The phenomenon of the output signal slowly changing independent of the measured property is called: *1 point*

a. Aliasing
b. Drift
c. Hysteresis
d. None of these

a.
b.
c.
d.

No, the answer is incorrect.
Score: 0
Accepted Answers:
b.

Assignment 12

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

Due on 2019-04-24, 23:59 IST.

1) If all the data points are same, statistical dispersion becomes – *1 point*

- a. 1
- b. 10
- c. 100
- d. None

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. None

2) The desirable characteristics of an IoT sensor node are *1 point*

- a. Energy-efficiency
- b. Distributed sensing
- c. Low-cost
- d. All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of the above

3) Long term trend tracking and preventive care in IoT healthcare is possible due to *1 point*

- a. ability of smart devices to collect data autonomously
- b. ubiquitous connectivity
- c. smart algorithms and analytics
- d. all of the above

a. Provides better quality of life

b. Provides information accurately in a reliable manner

c. Provides continuous monitoring support.

d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

5) Network-based activity recognition is: ***1 point***

a. Larger and processing intensive

b. Low power consumption

c. Dependent on network connection

d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

6) Which of these is a feature of qualitative data analytics? ***1 point***

a. Data is not described through numerical values

b. Described by some sort of descriptive context such as text

c. Data can be gathered by many methods such as interviews, videos and audio recordings, field notes.

d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

7) Which is true? ***1 point***

a. The statistical model is defined as the mathematical equation that are formulated in the form of relationships between variables.

b. A statistical model illustrates how a set of random variables is related to another set of random variables.

c. Both a and b

d. None of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
c. Both a and b

8) ANOVA is applied ***1 point***

a. when less than 2 samples/populations are to be compared

b. when more than 2 samples/populations are to be compared

c. Both a and b

d. None of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
b. when more than 2 samples/populations are to be compared

9) Which of the following can be the reasons for packet drop in IoT network? ***1 point***

- a. Dense foliage
- b. High temperature
- c. Rain
- d. All of the above

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of the above

10) The types of ANOVA are: ***1 point***

- a. 2
- b. 3
- c. 4
- d. 5

No, the answer is incorrect.
Score: 0

Accepted Answers:
b. 3

11) Wearables can be used for: ***1 point***

- a. Child-care
- b. Elderly-care
- c. Entertainment
- d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

12) Wearable-based activity monitoring can be used for: ***1 point***

- a. Continuous monitoring of activity results in daily observation of human behavior and repetitive patterns in their activities.
- b. Easy integration and fast equipping
- c. Long term monitoring
- d. All of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
d. All of these

13) Which of these is true is case of network based activity monitoring? ***1 point***

- a. Larger and processing intensive methods can be applied

b. Group based analytics possible

c. Both a and b

d. None of these

No, the answer is incorrect.
Score: 0

Accepted Answers:
c. Both a and b

14) What is the network topology of Ambusens WBAN devices? ***1 point***

a. Bus topology

b. Star Topology
